Hyderabad, India 500008

Skills

- C# programming
- ASP.NET MVC
- API development
- Entity Framework
- Azure DevOps
- Git version control
- PostgreSQL

Education

05/2023
Bachelor Of Technology:
Electrical And Electronics
Engineering
**Madanapalle Institute Of
Technology And Sciences**
Madanapalle,India

05/2019
Intermediate:
MPC
Narayana Junior College
Kadapa, Andhra Pradesh

04/2017
High School:
SSC
Ravindra Bharathi High School
Kadapa, Andhra Pradesh

Languages

English: C1
Advanced (C1)
Hindi: B2
Upper Intermediate (B2)

Certifications

- AI-900: Azure AI Fundamentals

Kyvalya Pothula

Summary

Backend Software Engineer with 3 years of experience in designing and deploying scalable RESTful APIs and backend systems. Expertise in ASP.NET Core, C#, and Entity Framework Core, with a focus on optimizing PostgreSQL databases. Implemented secure coding practices and enhanced delivery efficiency using CI/CD pipelines in Azure DevOps, contributing to clean-code solutions that drive business value.

Experience

Accenture - Packaged App Development Associate
Hyderabad, India
07/2023 - Current

- **Core Backend Development & Architecture**
- Engineered scalable backend services and RESTful APIs using ASP.NET Core and C# supporting enterprise web applications.
- Implemented SOLID principles and Clean Architecture patterns (Repository, Unit of Work), increasing system maintainability and reducing technical debt by 15%.
- Developed API contracts and structured error-handling mechanisms to ensure seamless integration between backend services and frontend systems.
- **Database Performance & Optimisation**
- Optimised Entity Framework Core (EF Core) queries and implemented eager loading, improving API response times by 25-30%.
- Designed and managed PostgreSQL database schemas normalised to ensure data consistency across environments.
- Refined SQL query performance through strategic indexing and execution plan analysis, significantly reducing database load and increasing transaction efficiency.
- **DevOps, Security & Agile**
- Automated build and deployment processes by configuring CI/CD pipelines in Azure DevOps, reducing deployment lead time.
- Strengthened application security by implementing secure coding practices, including input validation, SQL injection prevention, and structured exception handling.

- DP-900: Azure Data Fundamentals
